

# Prevent cancer in women with hereditary risk

Operationalizing genetic cancer risk assessment can help you stop cancer before it starts:

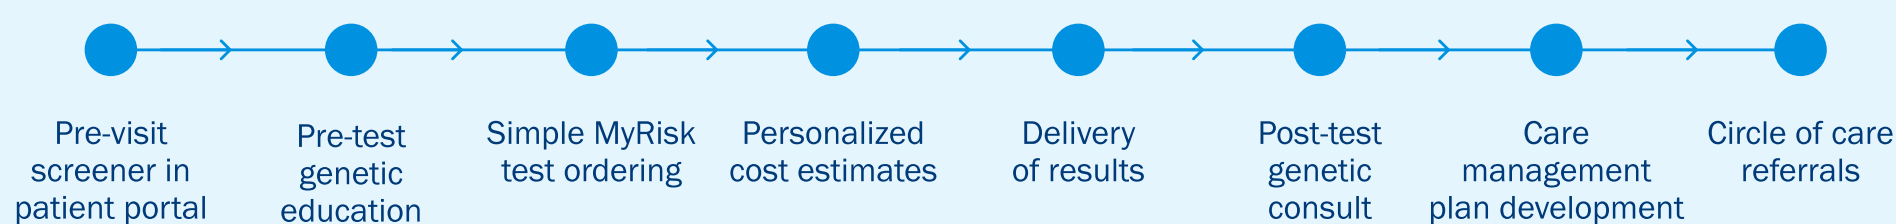

**28%** of women meet guidelines for hereditary cancer testing<sup>1</sup>

**53%** of patients that receive the MyRisk® test may benefit from changes in medical management<sup>2</sup>

A programmatic approach can make all the difference for women at high risk.

This is how it works:

Myriad can help you build it.

We work onsite with you to:

## Design your program

Success depends on leadership and staff buy-in, streamlined processes, and top-tier patient support from the very beginning.

### We can:

Support navigation of EMR integration to streamline assessment, testing, and referrals within your circle of care

Provide workflow assistance and best practice training

Deliver best-in-class hereditary cancer education and testing with no-cost on-demand board-certified genetic counselors available M-F to answer patient questions

Help assemble and coordinate clinical, administrative, and operations stakeholders

Our top-rated<sup>3</sup>  
GENETIC COUNSELORS RESPOND IN  
**200+**  
LANGUAGES

## Engage your teams

Myriad helps clinicians and staff understand the purpose, value, and flow of your new program to help it run efficiently.

### We can:

Provide on-site initial and ongoing training to educate and reinforce best practices

Offer medical science liaison support for providers and their teams in answering timely clinical, testing, and results-related questions

Support program stakeholders through meeting organization and coordination

Advocate for workflow refinements

### We provide

**ONSITE  
TRAINING**  
pre- and post-launch  
WITH FOLLOW-UPS AS NEEDED

## Address affordability

To improve utilization and reach every possible patient, you need to keep out-of-pocket costs as low as possible.

### We can:

Provide clear cost estimates to help ensure financial concerns don't become a barrier to testing

Provide affordable direct-pay options and financial assistance

Bring real-world data to internal long-term cost/benefit discussions

Help patients navigate cost and coverage questions without burdening your busy frontline staff

With MyRisk test results, help identify your high-risk patients who may require preventive services like High-Risk Consults, Breast MRIs, and Prophylactic Surgeries

### Most insured patients pay

**\$0** OUT OF POCKET<sup>4</sup>

## Schedule a 20-minute discovery call to discuss your needs.

Schedule a call at [healthsystems@myriad.com](mailto:healthsystems@myriad.com) to learn how Myriad's proven collaborative approach can help you launch, scale, and sustain an affordable hereditary cancer risk assessment program that identifies high-risk patients for improved medical management within your circle of care.
